German	Basic

Anik Shekhar Mazumder

B.SC. CIVIL & ENVIRONMENTAL ENGINEERING · SUST, SYLHET · FINAL SEMESTER

PROFESSIONAL SUMMARY

Detail-oriented Civil & Environmental Engineering graduate with expertise in structural design, GIS-based spatial analysis, and environmental impact assessment. Proficient in integrating Python automation with ArcGIS Pro to optimize technical workflows. Passionate about sustainable urban waste management and seeking to apply rigorous analytical skills to high-impact engineering projects.

EDUCATION

B.Sc. Engineering — Civil & Environmental Engineering

2020 – Present

Shahjalal University of Science and Technology (SUST)

Sylhet, Bangladesh · CGPA: 3.01 · Final Semester (4/2) — Appeared

Higher Secondary Certificate (HSC) — Science

2018 – 2020

Cumilla Victoria Government College

Cumilla, Bangladesh · GPA: 5.00 / 5.00

Secondary School Certificate (SSC) — Science

2016 – 2018

Ispahani Public School and College

Cumilla, Bangladesh · GPA: 5.00 / 5.00

SOFTWARE & TOOLS

AutoCAD

ETABS

ArcGIS Pro

OpenLCA

MODFLOW

Python

C Programming

MS Office Suite

Web Scraping

Front-End Development

RESEARCH & PROJECTS

Undergraduate Thesis — GIS-Based Life Cycle Assessment of Plastic Waste-to-Energy Conversion Through Pyrolysis

Nov 2025 – Present

A Sustainable Framework for Urban Waste Management in Sylhet City

- Spatial Analysis:** Conducted ward-wise plastic waste mapping in Sylhet using ArcGIS Pro to identify high-priority zones.
- Site Suitability:** Used multi-criteria overlay techniques to locate optimal sites for waste-to-energy pyrolysis plants.
- Workflow Automation:** Developed Python scripts in ArcGIS Pro to automate geospatial data processing and improve accuracy.
- LCA Research:** Executing a comparative Life Cycle Assessment (OpenLCA) of three pyrolysis routes to find the most sustainable pathway.
- Sustainability Framework:** Developing a data-driven plastic management model for rapidly urbanizing South Asian cities.
